WORK EXPERIENCE (2 YEARS)

Software Engineer
CGI Information Systems and Management Consultant, Hyderabad

07/2023 - Present

Achievements/Tasks
- Contributed to the development of a configurable software solution tailored for central market operations, prioritizing user-friendliness and adaptability.
- Led the development and integration of new features using Java, Angular, and React.js technologies, resulting in improved user experience and heightened client satisfaction.
- Successfully identified and resolved complex bugs, ensuring optimal system performance and reliability.
- Implemented and configured CI/CD pipelines using Azure DevOps, automating the build, test, and deployment processes.
- Worked in an Agile development environment, participating in sprint planning, daily stand-ups, and retrospective meetings to ensure efficient project delivery.

Software Engineer
Crabroom PayInt LLC, Hyderabad

12/2022 - 06/2023

A payment integration company offers tools and services that enable businesses to seamlessly integrate payment processing into their workflow.

Achievements/Tasks
- Seamlessly integrated Stripe payment solutions across a spectrum of platforms including web Node.js, WordPress, Java, PHP, and Python applications.
- Demonstrated proficiency in configuring and deploying applications on AWS Lambda, ensuring smooth and efficient operations.
- Facilitated client engagement to discern their payment integration needs for optimal business operation.
- Contributed significantly to the development of a sophisticated fraud detection application, utilizing Java, React, and Stripe technologies.
- Played an integral role in enhancing organizational capabilities by leveraging innovative solutions for payment integration and fraud detection.
